Wes Ehrecke, President (wese@iowagaming.org) • www.iowagaming.org

2004 Gaming Revenue Earmarked for Programs Supported by the Environment First Fund

Agricultural Drainage Well Closure Assistance Program **\$500,000**

The program closes agricultural drainage wells in the tiled-drained regions of the state that may contaminate underground drinking water supplies and develops alternative drainage outlets needed to replace the wells.

Air Quality Monitoring Equipment **\$500,000**

Monies are used toward equipment to provide air quality monitoring at animal confinement operations.

Brownfield Redevelopment Program **\$500,000**

Funds are used to clean up contaminated commercial or industrial sites.

Conservation Reserve Enhancement Program (CREP) **\$1.5 Million**

CREP provides incentives for wetlands development that will target tile-drained areas of the state. CREP's purpose is to reduce nutrient and pollutant runoff in rivers and streams. In addition to improving water quality, the wetlands will provide wildlife habitat and increase recreational opportunities.

Conservation Reserve Program (CRP) **\$2 Million**

CRP provides financial incentives to landowners for vegetative buffers, grassed waterways and other types of buffer strips.

Integrated Farm And Livestock Management Demonstration Program (IFLM) **\$850,000**

The IFLM program provides funding to demonstrate the effectiveness and adaptability of emerging agricultural systems for nutrient and pesticide management, air quality protection and soil and water conservation. Agricultural inputs of tillage, fertility, and pest management can be managed to optimize production and minimize potential impacts of sediment, nutrients and pesticides on the state's soil and water resources.

Geographic Information System Development **\$195,000**

The purpose of the Geographic Information System is to improve the availability, integration and analysis of natural resource information, and to improve decisions regarding the management, development and protection of Iowa's natural resources.

Lake Restoration **\$1 Million**

Lake restoration appropriation provides funding for lake restoration watershed improvement projects within Iowa.

Loess Hills Conservation **\$600,000**

Funds for the Loess Hills are used for two different purposes. The money appropriated for the Hungry Canyons account is used to stabilize stream channels that have been damaged due to soil erosion. The money appropriated to the Loess Hills Alliance account is used for conservation and preservation of the Loess Hills area through the purchase of land or conservation easements.

Park Operations **\$2 Million**

Funds are earmarked for all facets of state park operations to allow DNR to care for these highly valued and precious natural resources; so thousands of people can enjoy the many outdoor activities being offered.

Resource Enhancement and Protection Program (REAP) **\$11 Million**

The REAP Program invests in the enhancement and protection of the state's natural and cultural resources.

Soil Conservation Cost Share **\$5.5 Million**

State funds are made available to landowners to pay a portion of approved permanent soil and water conservation practices. This provides permanent protection of Iowa's soil resources and water quality, giving the public clean water for drinking and recreation.

Southern Iowa Conservation **\$300,000**

Money will be used to stabilize stream channels that have been damaged due to soil erosion.

Volunteer Water Quality Initiative **\$100,000**

This program aims to expand citizen water monitoring in Iowa, helps citizens become involved in protecting and improving water resources, and increases accurate information on Iowa's water resources.

Water Quality Monitoring Stations **\$2.955 Million**

This expands professional water quality monitoring to provide reliable information about the quality of the state's water, and also strengthens Iowa's citizen monitoring program.

Water Quality Protection Fund **\$1 Million**

Funds are used to help support the federal Safe Drinking Water Act. This act provides strengthened protections to ensure that American families have clean, safe tap water. It also gives Americans the right to know about tap water contaminants and if the water they drink could be harmful. With this act in place, it helps to provide monetary support to communities that may have contaminated tap water, but may not have the funds to improve it.

Watershed Protection Program **\$2.7 Million**

Money targets water quality problems and improves the state's impaired water bodies.

\$15 Million is allocated from gaming tax revenues for 20 years to fund Vision Iowa, community attractions and tourism grants.

Vision Iowa Project Summaries

River Renaissance on the Mississippi, Davenport, \$20,000,000

River City Music Corridor

- Expansion of Adler Theater
- Renovation of the Redstone Building
- Development of a River Courtyard
- Rhythm City Skywalk Bridge

Arts Corridor

- Construction of Figge Arts Center
- Development of an Arts Walk
- Construction of parking facilities

New Economy Corridor

- Construction of AgTech Venture Capital Center
- Additional parking

Capital City Vision Project, Polk County, \$55,000,000

- Construction and development of the Iowa Events Center
- New facilities for the Science Center of Iowa
- Development of Hall of Pride

Plus \$15 Million Forgivable Loan is contingent on completion of:

- New Downtown Public Library
- Rehabilitation of World Food Prize
- John Pappajohn Learning Center

River's Edge, Sioux City, \$21,000,000

- Construction of new events center
- Lewis and Clark Interpretive Center
- Ground transportation center

Mid-America Recreation and Convention Complex, Council Bluffs, \$24,000,000

Plus \$7 Million Loan

- Construction of multi-use arena
- Multi-use field house/exhibit facility
- Convention complex

America's River at the Port of Dubuque, Dubuque, \$40,000,000

- Mississippi River Discovery Center
- Mississippi River National Education and Conference Center
- Riverwalk and amenities
- Riverfront hotel and indoor waterpark

West Tarkio Reservoir/Lake, Shenandoah and Clarinda \$12,000,000

- Development of a 1,600 acre reservoir/lake
- Community leaders envision this to spark a rebirth in the area Cities of Shenandoah and Clarinda

Rediscovering the River, Des Moines, \$4,000,000

- 1.2 mile pedestrian promenade slated for construction on the east and west sides of the Des Moines River.
- 2 mile multi-purpose trail will connect this promenade with Gray's Lake.
- Envisioned for the project will be a fountain, civic gardens and an ice skating rink.

Bridge View Center, Ottumwa, \$7,500,000

- Expand Ottumwa Coliseum to create multi-purpose exhibition hall
- New performing arts center

Things To Do With A River View, Clinton, \$3,300,000

- Aquatic center
- Marina
- Skate park
- Recreational vehicle park
- Mississippi River's Edge Trail
- Renovation of the Clinton Area Showboat Theatre and the River View Baseball Stadium

Cedar Valley River Renaissance, Waterloo, \$9,500,000

- Cedar River Plaza
- Downtown Pedestrian Riverwalk Loop
- Wellness and Sports Complex
- Cedar River Dam
- Grout Museum
- African-American Museum
- EMA Community Center
- Veterans Center

Great River Gateway, Burlington and Des Moines County, \$5,250,000

- Project to enhance cultural and recreational opportunities in the area.
- Improvements will be made to Community Field, home of the Burlington Bees minor league baseball team.
- Renovations to Burlington Memorial Auditorium.
- Construction of a new public library.
